Foundation and slab stabilization guaranteed to within (+/-) 1/4" **PROPOSAL**

Kansas Basement & Foundation Repair, Inc.

- Will furnish labor and material for the installation of 4 steel piers to stabilize the vertical settlement of the area in red only of the building at the above address (see sketch).
- Backfill and compact all removed dirt or stone and replace concrete that we removed.
- Complete the above within approximately 1-2 working days.
- Is not responsible for tile, carpet, paneling, appliances, air conditioners, outside plantings, etc. that need to be removed and replaced. We will, however, exercise care in replanting those plantings removed by us.
- Assume normal construction and concrete thickness. If this is not the case, or if previous concrete underpins/piers are encountered, an additional charge will be made to prepare the affected area for proper installation of the steel piers.

25 year transferable warranty against future vertical settlement in work area.

Homeowner is to remove paving stones in work area prior to installation.

We will lift foundation as possible without causing further structural damage and stabilize

*\$4950.00
Paid 6/19/2016*

Amount \$ \$4,950
Tax \$ 0
Total \$ 4,950

Terrain Correction Needed Yes No
